

## Essential Linear Algebra with Applications: A Problem-Solving Approach

By Titu Andreescu

Birkhauser. Hardcover. Book Condition: New. Hardcover. 350 pages. Dimensions: 0.0in. x 0.0in. x 0.0in. Rooted in a pedagogically successful problem-solving approach to linear algebra, this work fills a gap in the literature that is sharply divided between, on the one end, elementary texts with only limited exercises and examples, and, at the other end, books too advanced in prerequisites and too specialized in focus to appeal to a wide audience. Instead, it clearly develops the theoretical foundations of vector spaces, linear equations, matrix algebra, eigenvectors, and orthogonality, while simultaneously emphasizing applications to fields such as biology, economics, computer graphics, electrical engineering, cryptography, and political science. Key features: Intertwined discussion of linear algebra and geometry Example-driven exposition; each section starts with a concise overview of important concepts, followed by a selection of fully-solved problems Over 500 problems are carefully selected for instructive appeal, elegance, and theoretical importance; roughly half include complete solutions Two or more solutions provided to many of the problems; paired solutions range from step-by-step, elementary methods whose purpose is to strengthen basic comprehension to more sophisticated, powerful proofs to challenge advanced readers Appendices with review material on complex variables Ideal as an introduction to linear algebra, the extensive exercises and...

### Reviews

*This book may be really worth a read through, and far better than other. it was actually writtern extremely completely and valuable. I am just very easily will get a satisfaction of looking at a published ebook.*

-- Lillie Toy

*It is easy in read through easier to fully grasp. it had been writtern very completely and useful. I am pleased to let you know that here is the greatest book we have read during my personal life and could be he very best book for possibly.*

-- Miss Marge Jerde
