BUILD A SHIP IN A BOTTLE: THE COMPLETE HOW TO GUIDE TO MASTERING THE ANCIENT MARINERS ART OF SHIP IN A BOTTLE BUILDING.

CreateSpace Independent Publishing Platform, 2010. Paperback. Book Condition: New. 1450596150 The complete how to guide to mastering the ancient mariners art of ship in a bottle building. This exciting new text details all the tricks of the trade and secretes involved in building these unique miniature sailing vessels. Capt. Dan teaches builders to understand the basic principals involved in building these tall ship replicas. After reading this heavily illustrated text, readers should have a good understanding of how to design rig and build both square sailed as well as fore and aft rigged vessels. They will then be able to apply these basic principles and techniques to build any type of sailing ship they choose. Please note that there are many different techniques used by different builders in creating their ship models. Some use elaborate mast hinges while others contend with a maze of rigging lines which all run through and under the hull. This book teaches Capt. Dan's basic and the straight forward simple techniques that the authors uses on all of his ship in a bottle models. These basics can be enhanced and modified as model builders become more proficient. Capt. Dan has included a showcase of ship in bottle images from some of the best master model builders in the world. Anyone that is interested in maritime history, sailing or just loves the sea, will enjoy crafting and then displaying their own nautical ship in a bottle. About the Author: Capt.
